

Engaging with safety - The “US” course

The art and science of engaging your workforce with your safety culture

Our experience

- Oil field -Middle East and Africa – BP, Shell, Pakistan Oil, Oman Oil, QGPC. Safety training and drilling engineering
- Systemic Consult Ltd - risk management and how behaviours impact on all areas of the business. The risk register, which outlines the most likely risks for corporates, is not about events but about people’s behaviours – US !
- China – Shingmei Group- ISO auditing and behavioural safety

Our safety sessions

Behavioural Safety – 45 minutes (It’s about US)

- + Do you know why we behave as we do? Kahnemans decision making
- + Heinrichs triangle- don’t think it won’t happen to you!
- + Why we can’t engineer out hazards – pathogens or behaviours
- + How our minds impact on decision making?
- + Do you know how to help yourselves and others be safe?

This short lighthearted course gets a serious message across through understanding why we do what we do as people.

Safety culture – 90 minutes (from –ve to +ve)

As above +

- + Safety culture – from –ve to +ve in 30 minutes!?
- + Empowerment = Engagement
- + Soon, certain, positive - reinforcers
- + Managing risky people and the power of the crowd
- + ‘It’s how we work around here’ – what’s your culture telling people?
- + Leading from the front

This short lighthearted course gets a serious message across through understanding how to engage people with safety through promoting a +ve safety culture and how to manage that going forward.
